

# Seven Days in the Sun

## Feeder

I've got a friend, her name is Laura  
We took a holiday, seven sweet days in Mallorca  
We took a plane through to southern Spain To see the ocean waves blue, we sat and watched  
The moon as crickets sung back cover tunes  
Way back in May Seven, seven days in the sun, yeah  
She's my heaven, she's a spark  
Feels like heaven, so light me up She's got this friend, his name is Paula  
He likes to cross dress every Friday night  
In clothes from Prada We took a train, left behind the rain  
To see the summer sunset glow  
But now she's not around, I'm hanging on  
With broken hands, way above the clouds Seven days in the sun, seven days  
In the sun, sun, she's my heaven, she's a spark  
Feels like heaven, so light me up You really light me up, you really light me up  
You really light me up, you really light me up  
You really Staring through the crowd  
It's pulling me underground  
And who's gonna dig me out? We used to take a walk on velvet sands across the beach  
We used to build a fire, and stare into the rising heat  
You used to set me free, lift me from the concrete seas  
Seven days in the sun She's my heaven, she's a spark  
Feels like heaven, so light me up You really light me up, you really light me up  
You really light me up, you really light me up  
You really light me up, you really light me up  
You really light me up, you really light me up  
You blow my mind
