

Unity

The Code

theres a war going down between my brothers tonight
I dont want no war going down tonight
civilization ha I call it as I see it
I call it bullshit you know I still cannot believe it
our evolution now has gone the way of hate
a world evolved resolved in this stupid fate
stop this war
all so different yeah I say were all the same
all caught you know in the division game
self destruction fast impending like a bullet
no one can stop it once its fired no one can control it
stop this war
a final word, wait it's not a call to action
we aint no sect we aint no fucking faction
unity unity youve heard it all before
this time its not exclusive we want to stop a war
unity as one stand together
unity evolutions gonna come
