

Bang

Eve 6

The underworld element beckoned in a dream
To find a sidekick pronto
I should think Thelma not Daria
So I searched hard and near and far for
Someone the description called for
Thought seldom not Daria Found her in a suburban wasteland
Swaddling clothed and caked in beach sand
At first I thought that I might
Turn and run out of fear and intrigue
Stood locked in a military
I found her, I keep her Safe and sound, don't make a sound
Look up at the sky shit's going down I heard a bang as stars collided
Her skin drew me in just like a magnet
Little girl my little world is yours
I heard a bang as stars collided
Her skin drew me in just like a magnet
Little girl my little world is yours Run away with me I took a one-way highway headed west heaven bound
Never even thought once to turn round
Real life plays tricks on the brain
Pointed fingers were left in the dust and
No one to doubt it rusted
We're out of here like Vladamir Now I'm looking at a picture where I'm right beside you
I shine with the light that binds you
To this fool with superglue
From all the way across the nation
You came with just your name and
Your suitcase, I'll keep you Safe and sound, don't make a sound
Look up at the sky shit's going down I heard a bang as stars collided
Her skin drew me in just like a magnet
Little girl my little world is yours
I heard a bang as stars collided
Her skin drew me in just like a magnet
Little girl my little world is yours Big bang, little girl run away with me
And be like Thelma and Louise
What's that? Send off your ass girl
Questions later, love me long time Big bang, little girl run away with me
And be like Thelma and Louise
What's that? Send off your ass girl
Questions later, love me long time Big bang, little girl run away with me

And be like Thelma and Louise
What's that? Send off your ass girl
Questions later, love me long timeBig bang, little girl run away with me
And be like Thelma and Louise
What's that? Send off your ass girl
Questions later, love me long time
