

# Love to Burn

## Neil Young

Late one night I was walking in the valley of hearts.  
A spirit came to me and said: You gotta move to start  
    You gotta take the first step  
    You gotta crawl to be tall

And then she told me something, something that I'll never forget. You got love to burn.  
    You better take your chance on love.  
    You got to let your guard down  
    You better take a chance,  
        A chance on love.  
    Take chance on love

On love. In the valley of hearts there's a house full of broken windows  
    And the lovers inside just quarrel all the time  
        Why'd you ruin my life?  
        Where you takin' my kid?

And they hold each other saying: How did it come to this? You got love to burn.  
    You better take your chance on love.  
    You got to let your guard down  
    You better take a chance,  
        A chance on love.  
    Take chance on love  
        On love.
