

# Peach

## Blur

Chemical eats best part of the peach  
You're always the way you are  
What if that going to close you in You've got a gaping hole in your head  
I'd let the birds nest there instead A gun in your pocket and hair in a locket  
Around your neck from the girl you once loved  
Where is she now? You've gone crazy You've got a gaping hole in your head  
I'd let the birds nest there instead  
You've got a gaping hole in your head  
I'd let the birds nest there instead You've got a gaping hole in your head  
I'd let the birds nest there instead  
You've got a gaping hole in your head  
I'd let the birds nest there instead You've got a gaping hole in your head  
I'd let the birds nest there instead
