The Moment We Come Alive

Red

We're living in a desperate time
I only hope is believing there's another side
To all we've known the truth hidden before our eyes
A vision of a life beyond our view
If only we could see it throughSo reach to the sky
The life we have has come
This part of our lives
We've only just begun
Together we are bright as the stars
We live like we'll never die
This is the moment we come aliveWe're living in a desperate time
Waking up to dreaming of a better life
We won't give up, our love is like a warning sign
The feeling of a life that's so brand new
If only we could see it throughSo reach to the sky
The life we have has come
This part of our lives
We've only just begun
Together we are bright as the stars
We live like we'll never die
This is the moment we come aliveThe moment we come alive,
The moment we come alive
The moment we come alive
The energy fueling us
Ignites us forever, forever, foreverSo reach to the sky
The life we have has come
This part of our lives
We've only just begun
Together we are bright as the stars
We live like we'll never die
This is the moment we come alive
