

# Bad Friend

## Bear Hands

I am training up  
Making right  
Watching what we build  
Slowly die  
And I wanna see you after life  
But I want to kill you bastard my  
Bad friend, but still I love you x4  
As the weeks drag on, wasting light  
Starting to dissolve, basic science  
Bad timing, we're flawed design  
Ghost writing, we're crooked spine  
Ohhh ohh I think the thrill is gone now  
And you're sleeping on the wrong couch  
While I am sneaking out  
Letchu in, let me down  
Bad friend, but still I love you x2Bad friend, but still I love you x8
