

California Sun

Baby Strange

California sun, was you never come here
You know, will breaks my heart until, know will breaks my heart until
California breeze, you never come near me
And you know, will breaks my heart until, know will breaks my heart until Baby when my friends are there, I'll
be there for you
Save spaces at you head, I'll be there with you California man, I don't think you understand
About way, she broke my heart until, way she broke my heart until
California people, you there cap all the time
As the sun beats down on the pretty faces, all the range falls still a mind Baby when my friends are there, I'll be
there for you
Save spaces at you head, I'll be there with you Baby when my friends are there, I'll be there for you
Save spaces at you head, I'll be there with you
Baby when my friends are there, I'll be there for you
Save spaces at you head, I'll be there with you
