

One More Day With You

Leap of Faith

Everyone it seems these days is scared what life may bring
Will I be acceptable, will I wear a wedding ring
I walk in to every day knowing you're by my side
Never worryin' about my life.
Its good to know you hold the light

Chorus:

One less mountain that I have to climb One less fear I face alone
The road ahead is paved with gold It feels just like I'm going home
One less pressure that can hold me down One less needless, sleepless night
One more day humming a happy tune One more day with you

Will I fit with my closest friends, will my first love love me too
Can I be an astronaut, will I do real well in school
Will our planet live in peace, is the fighting going to end
I know deep down in my heart
You're our loving caring friend

Chorus...

Bridge..

Will I grow old gracefully Will I be alone
What will be now, it will be The Cards are yours, yours to hold...

One less mountain that I have to climb One less fear I face alone
The road ahead is paved with gold It feels just like I'm going home
One less pressure that can hold me down One less needless, sleepless night
One more day humming a happy tune One more day with you
One less mountain that I have to climb One more day with you.
