

Fool The World

Drake Bell

Right in front of me
A couple makes what could melt the snow
Making fun of me
A single look never cut me so And I know
To save the conversation
I know
A deeper contemplation
Is all I need to make believe
Everyone would love me if I could fool the world Walk away from me
I see the change in the atmosphere
What a way to be
To turn the page
Just to make it clear and I know
To change the conversation
I know
A deeper contemplation
Is all I need to make believe
Everyone would love me if I could fool the world To fear
Or to disappear
What a waste of time
What a troubled mind
A fortune find for another day
As your passing by
You look behind
To see what I would say and I know
To change the conversation
I know
A deeper contemplation
Is all I need to make believe
Everyone would love me so I go
And change the conversation
I know
A deep conversation
Is all I need to make believe
Everyone would love me
If I could fool
The world [instrumental break] I can't survive another day in the live
Without a day in the sun
Before you touch me

Here's a word of advice
If I were you I would
Come get it
Come get it
Come get it so won't you tell me why it is
That every corner of my head is a home
But every fool is the same
It would be tragic if you left me alone
But left me no one to blame well don't it make you wonder what got us here
The covers that were under could disappear
Promises keep us in chains my dear (if I could fool the world then no one would know where I've been)
What am I feeling
(if I could fool the world then no one)
