

Something Isn't Right Here

The Juliana Theory

'Cause something isn't right here
You've gone and left me on the ground
Something isn't right in this world called confusion
You gave it all away before you could lose it
Something isn't right here on the ground, on the ground
You never said goodbye, you died
You chose to carry on a lie
And something isn't right here
You've gone and left me on the ground
Something isn't right in this world called confusion
You gave it all away before you could lose it
Something isn't right here on the ground, on the ground
Something isn't right in this world called confusion
You gave it all away before you could lose it
Something isn't right here on the ground, on the ground
