# Long Lost Friend

## Chicago

The moment that we met
There was something so familiar
I felt like I'd known you for a thousand years
And there inside your eyes
I saw a light that I'd been missingSomewhere deep inside
All of the lonely disappeared
And baby now you're here
I feel like I have foundA long lost friend, that I've lived for all my life
A gentle hand, a part of me I've been trying to find
And now you're here and the search comes to an end
I've found my long lost friendEvery move I make
Is to the rhythm of your heartbeat
Every single breath you take
You take with meOh, I ask myself, how did I ever live before you?
You came into my life
And put all the pieces into place
When I saw your face
I knew that I had foundA long lost friend, that I've lived for all my life
A gentle hand, a part of me I've been trying to find
And now you're here and the search comes to an end
I've found my long lost friendLike a storm out of the blue
Love rained down on me and you
So complete and so unexpectedly
Like a movie in my mind
I've seen a hundred times, I feel like
I've loved you before, long lost friendNow you're here and the search comes to an end
Long lost friend that I've lived for all my life
A gentle hand, you're a part of me I was dying to find
And now you're here and the search comes to an end
I've found my long lost friend, d' ya know that
I've found my long lost friendOh, now that I've found you
My lost friend, ooh
I've found my long lost friend
