

Silver Girl

Les Variations

Silver girl, stay until tomorrow
Take my heart away with just a single kiss
Silver girl, the world outside our window
Somehow fades away at moments like this
While tonight in the city street the people rush by
You and I are taking our time, precious time
Won't you lay with me, stay with me one moment more
I couldn't bear to see you walk out that door
Stay with me, stay with me, be my one in the world
For just one golden moment, my silver girl
The silver moon holds us in its power
With a magic that I'm not prepared to fight
With all my strength I've been holding back the hour
Lie beside me now if just for one night
Far below, in the city street the people rush by
You and I are taking our time, precious time
Won't you lay with me, stay with me one moment more
I couldn't bear to see you walk out that door
Stay with me, stay with me, be my one in the world
For just one golden moment, my silver girl
Won't you lay with me, stay with me one moment more
I couldn't bear to see you walk out that door
Stay with me, stay with me, be my one in the world
My silver girl
Won't you lay with me, stay with me one moment more
I couldn't bear to see you walk out that door
Stay with me, stay with me, be my one in the world
My silver girl
