Life Is Better With You

Eskimo Joe

Hey whatever happened to you last night
We thought we lost you there
Those long days
And long long nights
They keep you up insideStay awake all night talking about our friends
It never ends
Always do it when we're drunk
I just need some kind of meditation
Keep my feet from
Falling off the groundLife is better with youSee the people on the street
Hear the sound of defeat
It just seems to me we know too many people
It makes the ones we love seem greatLife is better with youIt happens all the time
The people pass you by
Like everyone you knew
They are changing through and through
You really didn't think it would last
But that's all in the pastLife is better with youSee the people on the street
Hear the sound of defeat
Like everybody that you know
Say they all want you to go
