Shake It

Rediscover

Now baby, just tell me when
I'll pick you up then
If you'll be ready, I'll be waitingNow baby, just tell me when
You been drinking
Too much and
You feel like leavingNow shake it
Like you mean it
Now fake it
Like I see itNow come on, baby, shake it
Like you mean it
Now take it
Like I need itOn our first date you run away
And come back another day
Phone tag you know I hateOn our first date you run away
And come back another day
The head games you love to playI don't wanna play
I don't wanna playOn our first date you run away
And come back another day
Phone tag you know I hateNow baby, just tell me to
Say I like you
I'll say it anyway
If that's alright tooNow baby, I won't ask you
If you don't want to
I won't hurt you
Unless you want me toOh, shake it, girl
I'll fake it, girl
You shake it
And I'm gonna take itOh, if you shake it, girl
I'll fake it, girl
If you shake it
Well then I'm gonna take itShake it like you mean itOn our first date you run away
And come back another day
Phone tag you know I hateOn our first date you run away
And come back another day
The head games you love to playI don't wanna play
I don't wanna playOn our first date you run away
And come back another day
Phone tag you know I hateMy face that haunts you
It pushes you back to

A corner in your bedroomWell baby, just don't be scared
When I touch you there
Don't act like you don't careIs it my face that haunts you?
And pushes you back to
A corner in your bedroomWell darling, just don't be scared
When I touch you there
Don't act like you don't careDon't be scaredOn our first date you run away
And come back another day
Phone tag you know I hateOn our first date you run away
And come back another day
The head games you love to playI don't wanna play
I don't wanna playOn our first date you run away
And come back another day
Phone tag you know I hateOh, shake it, girl
I'll fake it, girl
You shake it
And I'm gonna take itOh, if you shake it, girl
I'll fake it, girl
If you shake it
Well then I'm gonna take itAnd I need it, and I need it
And I need it, and I need it
And I need it, and I need it
Do you mean it? And I need it
