

# Pockets

## Olivine

By now you know that I never arrived  
I was too tired to move  
I was gonna invent an elaborate excuse  
But I'm tired of them tooLittle pockets of air in the atmosphere  
    Make it easy to breathe  
    So farewell to unpleasant scenes  
I want you to stay, stay, stayBlinding flash of circling stars  
    Left relatively shallow scars  
    Played your faux renaissance card  
To starry eyes and wild applauseLittle pockets of air in the atmosphere  
    Make it easy to breathe  
    So farewell to unpleasant scenes  
I want you to stay, stay, stay, want you to stayIt's not your, not your destination  
    Something, something better happen  
    It's not your, not your destination  
Something, something better happenLittle pockets of air in the atmosphere  
    Make it easy to breathe  
    So farewell to unpleasant scenes  
I want you to stay, stay, stayI want you to stay, stay, stay  
    Oh, I want you to stay, stay, stay  
    I want you to stay, stay
