

Anatomy 1ON1

MÃ¹/₂a

Undressin' you with your clothes on
Standin' up while we're layin' down
You found a position that turns me on
 Temperature's hotter than fire
And the heat has got me burnin' up
So let's stop, drop and roll together
 When we make, when we make
 When we make, when we make
 When we make love
 We use our imagination
And it always feels like the very first time
When you got your love in between mine
 And I'm lovin' it
This is what it feels, this is what it feels like
This is what it tastes, this is what it tastes like
This is what it looks, this is what it looks like
This is what it sounds, this is what it sounds like
 This is what it feels, this is what it feels like
 This is what it tastes, this is what it tastes like
 This is what it looks, this is what it looks like
This is what it sounds, this is what it sounds like
 Our bodies work like a playground
 Slippin', slidin', goin' round and round
And I like this ride, I don't wanna get off
 Oh, no, no
 And when you kiss my lips
 And then we kiss my lips
 You got me tremblin'
 I'm ready for the perfect hit
 When we make, when we make
 When we make, when we make
 When we make love
 Oh stay
 Creative with it, baby, all night long
Makin' sure it feels like the very first time
When you got your love in between mine
This is what it feels, this is what it feels like
This is what it tastes, this is what it tastes like
This is what it looks, this is what it looks like

This is what it sounds, this is what it sounds like
This is what it feels, this is what it feels like
This is what it tastes, this is what it tastes like
This is what it looks, this is what it looks like
This is what it sounds, this is what it sounds like
Feels soft, wet and creamy
Tastes sweeter than honey
Exotic sounds 'cause we're in paradise
Usin' everything from the top of my hair
Down to my toes, give you my all
My body, heart and soul
I'll shower you with my river of love
It's comin' down, I'm about to explode
This is what it feels, this is what it feels like
This is what it tastes, this is what it tastes like
This is what it looks, this is what it looks like
This is what it sounds, this is what it sounds like
When you lay me down, when liftin' me
Can you hear the sound of my body's peak
I wanna go have, let's make a child
This is what it feels like, every time we make love
This is what it sounds like
This is what it taste, this is what it tastes like
This is what it looks, this is what it looks like
This is what it sounds, this is what it sounds like
This is what it feels like, this is what it sounds like
