

Through the Glow

[Laura Veirs](#)

Flat stone skipping the surface sink
Into the golden deep
Crawl inside like a honeybee
Creep into the heart Give me snow and give me salt
Troubles cracks and creaks
Watch 'em tumble to the sea
Come back 'round you see Can you hear the cliff side's heart
Bubbling red and deep?
When you're slow not stop and start
You can burn a memory Gather with me like the gathering clouds
Smooth the twisted lines
Float above the quilted plains
Up to the stars we'll strain
