

# Last Curfew

## Truckfighters

Lost in time and there's no one else around  
A series of bomb blasts rip through the stay  
Leaving mark wave of sound  
It was bound to happen someday  
But why should it be the innocents  
That failed to get away No one will claim the responsibility  
Since reaching bail on the liberation  
Proves the cross itself  
Clues of freedom and justice for its own  
Where is the sense in killing the poor  
We can share and don't  
Some people claim that  
It's the government  
It really doesn't matter to me  
It's a crime you see  
But who will win if there's no one left  
Like who will stop this fire If not now, go to down  
We even lead you  
For a while there  
We will need you  
If we dare to  
Step on down The accusation is simply that we were right  
I think you'll see it time to strike the tide  
And when the firstborn looks into their face  
I won't be the same again  
If not now, go to down  
We even lead you  
For a while there  
We will need you  
If we dare to  
Step on down
