

Spiders

Moby

We just had to ask
Maybe some one out of Heaven
Would hear us down hereWe couldn't bear to stand
How the people leave us waiting
For something up thereOh, why did you leave?
And why won't you come?
And save us again?Come back to us spiders
Come uncrush my hand
Let peace and beauty reign
And bring us love again, like you canWe just didn't know
Someone there outside in Heaven
Heard us down hereWe couldn't stand it here
How the people leave us longing
For something up thereOh, why did you leave?
And why won't you come?
And save us again?Come back to us spiders
Come uncrush my hands
Let peace and beauty reign
And bring us love again, like you canCome back to us spiders
Come uncrush my hands
Let peace and beauty reign
And bring us love again, like you canSo much time, we need to ask everything
How did it go
You need it I got itCome back to us spiders
Come uncrush my hands
Let peace and beauty reign
And bring us love again, like you canCome back to us spiders
Come uncrush my hands
Let peace and beauty reign
And bring us love again, like you can
Like you can
