Make Me

Jennifer Paige

You look so confident the way you work the room
Like you're heaven sent, everybody checking you
Something about it, baby, keeping me amused
Hate to admit it but I kind of like your attitudeThings that you do and the things that you say
Gotta be for real if you want me to stay
Think that I'll jump if you want me to play
Well, you gotta do better than thatMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
The way that no one else can make meI see the wheels are turning, you've always been the best
You think you're the first, you better second guess
Before we get to that you gotta go like this
Show me I'm on top of your most wanted listThings that you do and the things that you say
Gotta be for real if you want me to stay
Think that I'll jump if you want me to play
Well, you gotta do better than thatMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
The way that no one else can make meMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
The way that no one else can make meNo easy come, no easy go
The way to my heart is through my soul
I'm giving you this simple fact
Think that I'll jump if you want me to play
Well, you gotta do better than thatMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
The way that no one else can make meMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
The way that no one else can make meMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
The way that no one else can make meMake me give you everything I've got
A reason to let you in my private thoughts
Take me to a higher place where I've never been
