

The Soul Cafe

Kaylow

Come on and take me... Where you wanna go
We Just make it .A place that I don't know
What we have here.have here is for sure
We don't hide cos you all just gotta know
We can party (party)... party through the night
When you're here I... surely I'm alright
I know that you'll like it (like it) ...So baby don't
be shy
Bringing out my... out my inner child.
This is the soulcafe
Welcome everybody
Get comfy in your body
It's not just a party
This is your soul cafe
Let go of your worries
Time to move your body
Let music soothe your heartache
You've had a long day and you want
Something to brighten up your day
You gotta hear me when I'm sayin
This is the only place to go
Excuse me dj on the decks (on the decks)
Go do your thing and make us dance (make us
dance)
Give us a piece of what's inside (piece of what's
inside)
So we can feast and drink all night
Bridge
Open up your heart and live just a lil bit
Don't worry about tomorrow it's out of your
hands right now
Appreciate the moment cos what we have right
here
Is the step into the strongest communion just to
grow, Gotta release the burden inside
X2
