Over and Over

Jean Shepard

Over and over you held me in your arms over and over you told me of my charms
Over and over I thought heaven's gift was mine
You swore that you would never leave me but too late I find
That you have lied again and it's goodbye again
Tears fill my eyes again and our love dies again
Over and over you have left me blue
But still I can't get over just bein' in love with you
[guitar]
Over and over you vowed you were mine alone over and over you said our love lives on
Over and over you pledged your heart to me
You gave me life you gave me hope but now too late I see
That you have lied again...
