Big Now

Channel Zero

Nowadays people have to be confronted
Visually, before they start worrying
About the problems that they refuse to see
As non-existent or overrated newspaper announcements
How many kids aged around 14 know what a condom looks like
Desire scores higher rates than self-protection
I share, this idea must tell, that AIDS has to be taken
Out of the silence in which it sneaksLook at you. You're big now
Adolescence conflict. You're big nowSpring time, roll the drums
Their new shoes are ready for the first steps
Middle finger in the air
They don't care what's wrong on this big ball
One thing we seem to forget
Were we better in our teens ? NO!You're big now !So we fall and stand up for the struggle of life
We learn the law of body communication
We don't know how to react
And tell me, who did ? When they were doing it for the first timeThen be careful where you go
This disease is searching for victims
This brand new pesticide
Is already reigning outrageous
So be, be aware
Play it safe and forsee addiction
You can make love, not war
Don't let it come that far
That AIDS is the one who's outlivingExpectations of a certain life style
Do you agree when decisions are taken for you
Married, children, tradition, prove you're big now
Married, children, tradition, and how do you feel now ?
So tell me, how do you feelSo we fall and stand up for the struggle of life
We learn the law of body communication
We don't know how to react
Who did ? When they were doing it for the first timeLook at you. You're big now
Adolescence conflict. You're big now
