

# Red Dress

## MAGIC!

YouShe's tried on everything  
Every little thing inside her closet  
And she knows it's getting late  
Knows that I been waiting and I'm starving  
'Cause we been working overtime  
She wants to make a night that we'll remember  
And I'm staring at the time  
Thinking it's alright, put on whateverBut I've been on my best behaviour  
Pacing back and forth  
And ten thousand lifetimes later  
When she walks through the doorI said hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
You in that red dress  
You in that red dressYeah, it's hard to concentrate  
Finish up your plate, she whispers to me  
But I got one thing on my mind  
As they pour the wine and it consumes meBut I've been on my best behaviour  
Not to 'cause a scene  
But when we finally get home later  
It's just you and meAnd I said hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
Hey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
You in that red dress  
YouHey you with the red dress on  
I said hey you with the red dress onHey you with the red dress on  
I gotta find a way to take it off  
I got a lot of love and it's growing strong  
When I see you with your red dress on  
You in that red dress  
You with that red dress on  
You with that red dress on
