

The Path of Least Resistance

Scar Symmetry

Advisory - the following lyrics contain explicit language:

The path of choice optimal
The labyrinth unsolved
Haunting the complex of these halls
Adrift upon the massive waves
This godforsaken maze
Suddenly returning to the haze
Guiding star shine bright tonight
And light up my path
Time has come to know myself
Least resistant path
Burning signals I'm finding
Least resistant path
Things to be said and done
I burn with the flames
Float with the uncontrolled waters
My soul flies with the breeze
Perplexed in vast complexity
Ghost in the machinery
Seeking the exit constantly
Facing a hopeless endeavor
Being one's own savior
Lost without a guiding star
Guiding star shine bright tonight
And light up my path
Time has come to know myself
Least resistant path
Burning signals I'm finding
Least resistant path
Things to be said and done
I burn with the flames
Float with the uncontrolled waters
Solid as the earth
My soul flies with the breeze
With every corner turned my heart sinks
A mirage lights my hope again
That silhouette could be anything
But I'm beyond the realm of reason
Least resistant path
Burning signals I'm finding
Least resistant path
Things to be said and done
I burn with the flames
Float with the uncontrolled waters
Solid as the earth

My soul flies with the breeze Guiding star shine bright tonight
And light up my path
Time has come to know myself
The path of least resistance
