

Suffocate

The Prototypes

Hate all the blood on my hands
And the sins that bleed from my soul
Take, I take it all away make it go away

Stand up for bein'

The last one to control

What you're seeing

It starts from me

And the last to know

Stand up for bein'

The last one to control

But what you can't see is bein'

The last one to know

Fade into a dream

Try and save me from myself now

Save me from myself now

Fallen from the world

If I could ever breathe in the air

Maybe then I wouldn't suffocate

Face all the things that were

Real to me long ago to save my

Name, I never thought it would

Be such a long way to fall

Stand up for bein'

The last one to control

What you're seeing

It starts from me

And the last to know

Stand up for bein'

The last one to control

But what you can't see is bein'

The last one to know

Fade into a dream

Try and save me from myself now

Save me from myself now

Fallen from the world

If I could ever breathe in the air

Maybe then I wouldn't suffocate

Fade into a dream

See me from myself

See me from myself
Fade into a dream
Try and save me from myself now
Save me from myself now
Fallen from the world
If I could ever breathe in the air
Maybe then I wouldn't suffocate
Stand up for bein'
The last one
Stand up for bein'
The last one to fall
Stand up for bein'
The last one
