

Happy

Robert DeLong

You come here you don't need an occasion
Just an ill-advised itchin' for the conversation
gotta get stuff goin', got a good vibration
Gettin' mixed results and mixing strong vibration?
When the sun god rises as your sleepin' it off
with the midday breakfast where I'm keepin' it up
Late day exit now I'm turnin' it off
now the sun god's rising as we're sleeping it off

still getting old spaces
still getting cold spaces
about to fall
I've got all the time, the time, the time [x2]

You come sober but a state after burning?
Got a time travel problem with electrical yearning
Gotta scrapbook the cycles keep the seasons from turning
Gotta slow, slow, slow, slow, slow it down

I see everything quite clear
but I don't get to feel it
and I see life outside of time
but I don't feel it

still getting old spaces
still getting cold spaces
about to fall
I've got all the time, the time, the time [x8]
