

# If I Was With You

Young Scola

"Feels like our relationship just can't take flight,  
But We Fly Folks, Now That Aint Right!" I hate all this distance that's between us

I feel like it's the reason we can't make it work  
It's a shame cuz we're the same, we're broken lovers  
So our hearts won't let us take another loss  
I'm startin to see that this time it's different  
Things just seem right with this one, yeah  
I just hope you see where my minds been drifting  
Thinking like life, like this  
Is really alright, when it's with you If I was with you  
I'd probably never let you go

If I was with you  
There'd be no problems you would ever know  
If I was with you  
Then things would be alright, girl  
If I was with you

I'd show you, your my type and I'm your type, yes you'd be my girl (echo) I know we disagree but hey who  
doesn't

If we do and no one leaves, then we should last (we should last)

See I try my best to be like no one other  
So I hate when you compare me to the past  
Please tell me you see that this time it's different  
Things just seem right with this one, yeah  
I'll be in ya corner when times get sicken  
hold you when life is slipping  
open ya mind to something new If I was with you  
I'd probably never let you go

If I was with you  
There'd be no problems you would ever know  
If I was with you  
Then things would be alright, girl  
If I was with you

I'd show you, your my type and I'm your type, yes you'd be my girl (echo) (Look)

I said I wouldn't try with my next boo  
But I opened up my mind when I met you  
I put my heart down on the line cuz you special  
and hoping that you wouldn't get to steppin like ya next move  
It gets to me when we fight  
And act like we don't care every night

Seems like our relationship just can't take flight  
But we fly folks, now that aint right  
Maybe it's the time spent away from your sight  
That got you thinkin like I aint the one for you life  
One of these days I'll be gone with the wind  
And you gone hate this song at the end  
and I'll be like damn I'm startin to see that this time it's different  
Things just seem right with this one, yeah  
I just hope you see where my minds been drifting  
Thinking like life, like this  
Is really alright, when it's with you If I was with you  
If I was with you (yeah)  
If I was with you (you)  
If I was with you  
If I was with you, we'd be perfect
