

The Hunger

Anna Bradley

(D. Dokken/ B. White)

What's wrong with you may be right for me

Don't need to feel your sympathy, no

In the dark I feel at home

I need the night to make my feelings known

All right, like a lone wolf, can't you see

Living false realities

Do you know just how I feel, can't explain it, but it's real

Lost in a world full of fear, it gives me passion

I'm just a lone wolf who's waiting

Waiting for life's attraction to give me

1st CHORUS:

The hunger...burning in my soul

With the hunger...everybody knows

It's the hunger...give me what I need

With the hunger...satisfaction guaranteed

Blackened sky on a full moon rise

Destiny, it calls to me

Some call it love, some call it more

I'll play that game if it gets me through the door

All right, like a lone wolf, can't you see

Living false realities

Do you know just how I feel, can't explain it, but it's real

Lost in a world full of fear, it gives me passion

I'm just a lone wolf who's waiting

Waiting for life's attraction to give me

2nd CHORUS:

The hunger...burning in my soul

With the hunger...everybody knows

It's the hunger...give me what I need

With the hunger...take a walk with me

BRIDGE

On the night I call your name

As we stop to play the game

Is it love, or fantasy

Living false realities

SOLO

1st CHORUS

The hunger (3x)
It's the hunger...
