

# Night and Day

## Hot Chip

The way I feel about you baby,  
In the middle of the night  
There's just one thing that I can do  
To make me feel alrightThe way I feel about you darling  
In the middle of the day  
There's just one thing that we can do  
To push the pain awayLet's sway, let's sway  
Let's sway, let's sway  
Let's sway, let's sway  
Let's sway, let's sway  
(You know I'm thinking about you)  
Night, day, night, day  
Night, day, night,  
You got me working night and day  
Night, day, night, day  
Night, day, night,If I could be beside you baby  
It would make the world alright  
The walls that fall around ourselves  
Would celebrate our night  
If I could be inside you darling  
At the center of your life  
I'd write no more upon the page  
We'd live with no disguiseLet's sway, let's sway  
Let's sway, let's sway  
Let's sway, let's sway  
Let's sway, let's sway  
(You know I'm thinking about you)  
Night and day and night (you got me working night and day)  
Night and day and night (you got me working night and day)  
Night and day and night (you got me working night and day)  
Night and day and nightI don't got no Abba  
I don't play no Gabba  
I like Zapp not Zappa  
So please quit your jibba jabba  
I've just lined up Macca  
When you're in Aiya Napa  
Do I look like a rapper?  
Do I look like a rapper?  
(You know I'm thinking about you)

(You know I'm thinking about you)Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)

Night and day and night (you got me working night and day)You got me working night and day
