

Jersey Never Seemed So Long

Element 101

It took three hours just to drive down to the shore
New Jersey never seemed so long I couldn't wait anymore
Those were the best times that I've had all year
Seems like it took forever but we finally got there It was a long time before I got all of my friends in the water
But this time when memories are made I won't let it pass me by
I love the sunshine, I'm going to make this day mine It took three hours just to drive down to the shore
New Jersey never seemed so long I couldn't wait anymore
Those were the best times that I've had all year
Seems like it took forever but we finally got there And when the day had grown so dark we ventured on a
moonlit walk
After we had gone on all the rides I saw the starlight in your eyes
The moon's so big and bright, this is the place to be tonight
The moon's so big and bright, this is the place to be tonight
