Talk Me Down

Darden Smith

You know I feel most the time
Like a kite on a line
Tossed about, no control
Any way the wind blowsThen I see you holding on
The string that runs me to you
All that keeping me tied to
This world so long, oh I'd be goneSo don't let me go, I might fly away
Come on talk me down when the light turns to black
When the weight on my back gets too much I start to bend
Cannot straighten out againI feel you there, you lift me up
When I'm out on the ledge
Just one step from the edge
You take my hand, you understand
