

Trouble in His Brain

A New Brain

DR. JAFAR BERENSTEINER

Brain.MIMI SCHWINN

Brain?DR. JAFAR BERENSTEINER

There's trouble in his brain.

Anneurism, tumor, we don't know.

Catscan told us lots of fluid sits around the brain.

And so, we must operate to drain.MIMI SCHWINN

Drain?DR. JAFAR BERENSTEINER

Drain the brain.

Put a shunt inside his skull and tube into his stomach

where he'll pee the fluid out.MIMI SCHWINN

Pee it out?DR. JAFAR BERENSTEINER

And without a doubt, we'll make it so we can say

what's going on inside his brain

Why something is amiss.

What's going on inside his brain
