## Zeni Geva

What's coming from  
beyond the sea of death  
it's words celebrating an eroded artery  
it's a creak of gravity  
to bury an internal exploded brain  
What's coming from  
beyond the sea of death  
it's a glitter of metal  
praying for vocal chords in despair  
it's a lament of ghosts  
shaking bleached backbones  
What's coming from  
beyond the sea of death  
it's a mirage of an alienated future  
Nobody appears yet ?  
to see a newborn light shining  
beyond the sea of death
