

How

Lewis Taylor

Well I'm sure that you've noticed I'm a little nervy baby
You're so much older and I don't wanna let you down
If you wanna know the truth about me baby
It feels like we're about to get it on for the first time
Maybe the wine is too strong
Something quite strange is a-happening here
You say snuggle down the night has just begun
I wanna know, how do you like to be done
I wanna get in deep and heavy
I want you to rock me right through this old bed
Let the telephone ring honey I don't care
We're getting down here tonight till we both turn cherry red
Let me get closer to you
Say what you want me to do
I'm in a sweat think I'm losing my mind
I say look a here you've got me on the run
How do you like to be done
Well, well, well
We got a cause for celebrating
Well, well, well
I hope it was well worth the waiting
Let me catch my breath before
Before we start to making love once again
