

Buzzin' In My Brain

Alu

There's a buzzin' in my brain
I really can't explain.
I think about it before they make me go to bed.

There's a dream inside my soul.
Don't wanna let it go.
I talk about it to the friends inside my head.

I wear my straitjacket at night
so someone can hold me tight.
The blue one makes me sleepy
and then I feel alright.

There's a buzzin' in my brain
the nurse tried to explain.
She says it's from the current of electricity.

There's an aching in my heart
I felt right from the start.
Too bad the buzzin' has replaced my memory.

Cuz if I make it out alive,
I'll meet you in the sky.
We'll buzz around like bees
and talk about world peace.

If you want me to, I could love you.
If you want me to, I probably could love you.
If you want me to, I could love you.
If you want me to, I probably could love you.
