

Street Player

Rufus

I'd never forget those nameless years
Street sounds whirling through my mind
Trouble was often in the air
So we thought to forget our despairCause I'm a street player
And I play you a song (play me a song, play me a song)
Cause my heart and soul
Will carry, carry onCity life's the only way
Street corners and billiard halls
Was my home away
Lesson's learned that still help me todayCause I'm a street player
And I've seen it all (play me a song, play me a song)
Hit men and thieves and many a brawl
But as you will see I still stand tallIt was such a small space and time
I would never knew that I would find
A musical past for all to see exciety to ecstasyI am a streetplayer
I am a streetplayer
I am a streetplayerCause I'm a street player
And I've seen it all (play me a song, play me a song)
But as you can see I still stand tallIt was such a small space and time
I would never knew that I would find
A musical past for all to see exciety to ecstasyI am a streetplayer
I am a streetplayer
I am a streetplayerCause I'm a street player
And I've seen it all (play me a song, play me a song)
The people love your soul
Don't let them down
Play your guitar
Play that funky music, child
