

# You Take the Devil out of Me

## Crippled Black Phoenix

Come rise you greater men  
Still of mind and dark within  
They won't come, they won't face the question. A small meal, the meat of hog  
Just pay the man then fetch my dog  
They won't come, they won't face the question Now he's southside  
A long way down  
As i think about it now he's  
On the other part of town  
His prayers are light  
His form is down  
As i think about it now he's  
On the other part of town.  
There's markings on her hand  
So her lover understands what working  
On the sounds without her around will allow him, will allow him  
Will allow him Take the knife, the folly blade (there's markings on her hand so her lover understands)  
Cut inside, scorch your way (what working on the sounds without her around will allow him, will allow him)  
These tracks are no places to play (will allow him, will allow him)  
Pray move aside  
Please step away Take the knife, the folly blade (there's markings on her hand so her lover understands)  
Cut inside, scorch your way (what working on the sounds without her around will allow him, will allow him)  
And i will never never never fall  
And i will never never never fall  
I'm followed by a mighty sage (there's markings on her hand so her lover understands)  
He whispers to me night and day (what working on the sounds without her around will allow him, will allow him)  
That i will never never never fall  
That i will never never never fall
