

Wamsutta Ridge

Scan the Sky

Let go, you can't do this on your own
They're speaking lies in every tone, that we speak
Far from something we have once known
This place seems so close to home, yet so far away
Let's get out of here
Back to the heart of the life we've left behind
Never look back
Only forward but remember the times we've had
Looking back on everything
The truth lies on every wing that we float on
How could you sleep at night knowing
That you won't wake up
Let's get out of here
Back to the heart of the life we've left behind
Never look back
Only forward but remember the times we've had
Let go
(You can't do this on your own)
Let's get out of here
Back to the heart of the life we've left behind
Never look back
Only forward but remember the times we've had
