

Take Me Away

Bananarama

Take me away with you, where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share this love I close my eyes, now it's clear
Feels like I've been sleeping for a million years
'Til you came, I couldn't see
Now your kiss is breathing life back into me Why worry about the world outside
We've got everything we need? Take me away with you, where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share this love How can I love you more?
Heaven knows that you're the one I've waited for
Now you're here, no more tears
Hold my hand and baby we can disappear Why worry about the world outside
We've got everything we need? Take me away with you, where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share this love Why worry about the world outside
We've got everything we need? Take me away with you, where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share this love Take me away with you, where we can do
All the things that we have ever wanted to
Take me away somewhere
Where we can share this love
