

After Gold

Kelpe

Baby, I'm feelin' kinda desperate
I don't get to see the real you inside
Drivin' blind is reckless
I can't help it, I can't read your mind
I really don't mean to push
But I need to see the truth tonight You hide your gold beneath the surface
And your, your shimmerin' light
You say you never had love
You say that you, you need to survive
Baby, I just wanna know you Angel dancing in the shadows
In the madness of your masquerade
All this tenderness is hollow
I can't follow if you won't let me stay
Do you wanna give me yourself
Or do you wanna give yourself away? After gold beneath the surface
And your, your shimmerin' light
You say you never loved someone
You say that you, you need to survive
Baby, I just wanna know you I can't see the real
I can't see the real you inside
Need to see the truth
Need to see the true you tonight You had your gold beneath the surface
And your, your shimmerin' light
You say you never loved someone
You say that you, you need to survive
Baby, I just wanna know you Baby, I just wanna know you
Baby, I just wanna know you
