

One Night

Tyrese

She off in the club, straight to the bar
Came with the girls, gonna leave with a star
Cause I got everything that she needs
She just my type, eye looking right
What she gonna get by the end of the night
In my bed, and on top of me
I can tell she a freak, trying to keep it on the low
Don't worry about it baby, ain't nobody gonna know
Come sit right here next to me, yeah
All about the Rose ok, don' worry about it Shawty, it's on me
Satisfaction guarantee All you need is one night, one night
One night with me,
We can have one night, one night
I promise you'll never leave
What I got's gonna mess your mind up
Give me the body I'm a fix that right up
I'm about to change your life
All I need is just one night, just one night
All I need is just one night, just one night
All I need is just one night, just one night Now baby don't act surprised, I'm about to blow your mind
I'll be dripping like water, in the middle of the summer
Last call, last call, last call for alcohol
Baby meet in the alley, black on black riding outside [?]
Drop the top girl just get in
[?] hair blowing in the wind
She can't keep her hands off me
Got me feeling all over her body
You want a little foreplay, ok
Seems like you're ready,
12 play, knock, knock, knock in the boots
Not a shit [?] looking [?] All you need is one night, one night
One night with me,
We can have one night, one night
I promise you'll never leave
What I got's gonna mess your mind up
Give me the body I'm a fix that right up
I'm about to change your life
All I need is just one night, just one night
All I need is just one night, just one night

All I need is just one night, just one night
I'm a get straight to the point, baby
All I need is just one night, just one night
You won't be disappointed baby
All I need is just one night, just one night.
