

Mind Block (feat. Eric Rachmany)

Stick Figure

Open up your windows, open up your eyes
Can you tell which way the wind blows, read between the lines
and your not perfect, no not tonight
But I'm usually playing on your stereo, to ease your mind I've been working, I've been working all night long
Trying to find the melody I'm singing in this song
Words come up and then again they're gone
Feels like I got the mind block Open up your windows, open up your eyes
Can you tell which way the wind blows, read between the lines
The mind stops moving, it works just fine
Reggae music on the radio, keeping our minds alive Open up your minds, find that spark inside
Time to focus, realize, good things take their time
And suddenly a glitter of a light shines bright
Possessing me with all of which I need to speak my mind
Ask me will I stop, no way
Cause your energy just dropped, no not today,
Ask me will I stop
We keep it rocking all day, let it all soak in I've been working, I've been working all night long
Trying to find the spark, finding out what I'm doing wrong
No problem I got time to focus on
I got some passion and more patience than I thought Will I stop, no way
Cause your energy just dropped, no not today,
Ask me will I stop
We keep it rocking all day, let it all soak in Well I found a simple solution
I'm bound where places I'm choosing
Lying down, gotta get up, keep moving
Let it all soak in
There's a world I don't know
Trying to find a place that I can go
There's a world I don't know
Trying to find a space I control Ask me will I stop, no way
Cause your energy just dropped, no not today,
Ask me will I stop
We keep it rocking all day, let it all soak in
Ask me will I stop
Ask me will I stop
