You

Chris Young

The bluest skies don't seem so blue
And the stars seem to be a little dimmer too
Now that you're around you put 'em all to shame
Let me break it down 'cause what I am trying to say isNo on gets me like you and when you kiss me
Girl you rock me harder than some downtown band
I thought I knew what love was, but I didn't have a clue
I never found anything that makes me feel like I do about youGot a whole new direction it seems these days
I used to rush off to work and get home late
But now I show up late and rush back home
My priorities are different, I can't leave you aloneNo on gets me like you and when you kiss me
Girl you rock me harder than some downtown band
I thought I knew what love was, but I didn't have a clue
I never found anything that make me feel like I do about youGirl if you ever get to guessing if I am thinking 'bout you
Just remember,No on gets me like you and when you kiss me
Girl you rock me harder than some downtown band
I thought I knew what love was, but I didn't have a clue
I never found anything that make me feel like I do about youYou, oh you
