

# Still Falls The Rain

## Roxy Music

Dear Hyde, no more can I explain  
I've tried with words in vain  
They pass you by like falling rain  
From perfect skies still falls the rain inside  
Hey brother don't be square  
Here it is not over there  
I'm your man, got it made  
You need my fire, need my shade  
You're here Hyde, once more inspire  
This strangely tied uncertain frame  
So torn inside, still falls the rain  
Two minds, one vein, still falls the rain inside  
Hey doctor don't be scared  
It's you and me so where's my share?  
I'm the man move aside  
Call me mister just call me Hyde  
Hey lover don't be shy  
I'm a single minded guy  
Better watch me boy I'm rough  
Half a man ain't strong enough  
Hey brother don't be square  
Here it is not over there  
I'm your man, got it made  
You feed my fire, need my shade
