Natural Disaster

Starfield

Had lips like candy
Hair floated like water
Skin like velvet made
The whole damn world slow down
She was a preacher's daughter
Never did what daddy taught her
And the rebel in her soul
Brought her to me
The river was cold
And the river was wide
She flowed from the mountain
Straight across the great divide
And her heart ran cold
But her love runs deep
She's fire on the mountain
Wrecking everyone she meets
She's like rain when she rolls in
But that sunshine in her thunder
Makes the loneliest heart wonder
If the ride is worth the pain
Might not be storm clouds inside
Oh but don't you worry friend
She's coming around the bend
She's holding lightning in both hands
Lord please know
It's not time for me to go
The river has my heart
She's the keeper of my soul
On one side of the water
Sweet everlasting grace
The other side could end your life

Or steal your breath away
She's like rain when she rolls in
But that sunshine in her thunder
Makes the loneliest heart wonder
If the ride is worth the pain
Might not be storm clouds inside
Oh but don't you worry friend

She's coming around the bend
She's holding lightning in both hands
She's a natural disaster
She'll tear the land in two
She's running to be running
Cause it's all she knows to do
She's a tumbleweed rolling
A river running wild
A hurricane blowing
She's the calm after the storm
Under an Appalachian sunset sky
She's like rain when she rolls in
But that sunshine in her thunder
Makes the loneliest heart wonder
If the ride is worth the pain
Might not be storm clouds inside
Oh but don't you worry friend
She's coming around the bend
She's holding lightning in both hands
She's like rain
She rolls in
But there's sunshine in her thunder
She's coming around the band
She's holding lightning in both hands
