

# The Power Age

## 2 Unlimited

Welcome to the power age  
Money, money, money  
The power age, it's the new generation  
We are the ones with no limitations  
We had the iron and the stone  
Now we got a new age that we own  
But it's not about the power that makes you blind  
It's all about the the power that's in your mind  
This is the time to get the power  
The power age, this is the hour  
So let the rythm take you on the floor  
To release all the pain that has been before  
To get with it, oh yeah, you belong  
There's only one force that makes you strong  
Oh, this is the power age  
We're reaching for the final destination  
To break out of the cage, get into the power age  
With all of the brand new generation  
Time to turn the page, we're living in the power age  
Break out of your cage into the power age  
The age of destruction, the age of hate  
And the age of violence and the ages of late  
Greed and gain, that's all they care  
Money, money, money, with enough to share  
So get with it, feel the vibration  
The power age, it's just a sensation  
You can feel it down in your soul  
When you let the force take control  
So by now you better know the deal  
You gotta get high to get real

Free you mind to disengage  
Welcome to the power age  
Oh, this is the power age  
We're reaching for the final destination  
To break out of the cage, get into the power age  
With all of the brand new generation  
Time to turn the page, we're living in the power age  
We're reaching for the final destination

To break out of the cage, get into the power age  
With all of the brand new generation  
Time to turn the page, we're living in the power age  
This is the power age  
This is the power age  
Swing it  
Swing it  
Get into the power age  
'Cause we're part of a new generation  
The power age  
Oh, this is the power age  
Yeah, the power age  
Oh, this is the power age  
We're reaching for the final destination  
To break out of the cage, get into the power age  
With all of the brand new generation  
Time to turn the page, we're living in the power age  
We're reaching for the final destination  
To break out of the cage, get into the power age  
With all of the brand new generation  
Time to turn the page, we're living in the power age
