

No Better Place

Stars

It was the clouds moved in another close
It goes inside their shape,
You'll stay
When the rain changes the plan
And falls another day,
You'll stay
And if the sun's to set, who needs to hide
Won't come out to play, it's okay There's no other place, there's no other place
There's no other place for us to find
There's no better place, there's no better place
There's no better place than by my side. Just as the tree would stand in the wind
And better snow,
You can't go
And the river would round each hard and rock
Never stops its flow,
You can't go
And in the spring, when everything's alive again
We can watch it grow,
We'll take it slow! There's no other place, there's no other place
There's no other place for us to find
There's no better place, there's no better place
There's no better place than by my side. I know you don't know yet,
But I'm the one who's gonna get in your head
Let's pretend this is such a good party
'Cause you can leave over my dead body I know you don't know yet,
But I'm the one who's gonna get in your head
Let's pretend this is such a good party
'Cause you can leave over my dead body You can only, you can only
You can only, you can only
I wanna leave, I wanna leave
