

# Our Whole Lives Tonight

## Eyeshine

Vivid signs that often come and fall across my face  
Visit me in memories and dreams that I displace  
I find myself forgetting who I promised I would be  
Look at me, look at you, it's time that we believe  
We started something here  
We started something here

Heart, don't fail me now  
I'm counting on all that exists in me  
Heart, don't fail me now  
I'm counting on all that exists in me

This is our whole lives tonight  
It may be our only chance to get it right  
This is our whole lives tonight  
It might be our only shot to get it right

I know that we can do this  
Come on, we made our choices  
Let's go, we must be heard  
Stand up and raise your voices  
I know that we can do this  
Come on, we made our choices  
Let's go, we must be heard  
We don't give a damn if we lose our voices

We will, we will stand our ground  
No, they can't hurt us now  
We're like no other  
And time will tell  
Bring it, bring, bring it all  
Can't you see we're not ones to crawl?  
Here we are  
We started up something here  
We started up something here

This is our whole lives tonight  
It may be our only chance to get it right

This is our whole lives tonight (I know that we can do this! Come on, we made our choices!)  
It might be our only shot to get it right (Let's go, we must be heard! We don't give a damn if we lose our

voices!)

This is our whole lives tonight (I know that we can do this! Come on, we made our choices!)

This is our whole lives tonight (Let's go, we must be heard! We don't give a damn if we lose our voices!)

This is our whole lives tonight (I know that we can do this! Come on, we made our choices!)

This is our whole lives tonight (Let's go, we must be heard! We don't give a damn if we lose our voices!)
